## ABOUT JAMIE LEIGH

---

## A DYNAMIC WEBSITE IS BOTH A WORK OF ART AND A FEAT OF TECHNOLOGY.

Which happens to be something I totally dig.

Hi. I'm Jamie Leigh. Like all people, I'm a multi-faceted human being.

On one hand, I'm a heart-centred creative. I've got a degree in visual anthropology and I'm fascinated by the unique ways we express ourselves and our worldviews. I believe creativity is at the core of what makes us human—and I love humans.

On the other hand, I'm all tech. I was a network administrator for 14 years. Industrial-strength passwords and redundant backups give me goosebumps (the good kind).

And right smack dab in the middle? That's me. I thrive at the intersection of brand development, digital strategy, and flawless design.
